

## **Copyright Declaration for Template Used in the Editorial**

All visual illustrations included in this article were produced using DALL-E, a text-to image generative system developed by OpenAI. Each image was created specifically for this publication and constitutes an original visual composition. The illustrations do not reproduce, adapt, or derive from any pre-existing copyrighted works and are free from third-party copyright restrictions. The images may be used, reproduced, and distributed as part of this article in accordance with standard academic and scholarly use.
